

AMENDMENTS

Listing of Claims:

The following listing of claims replaces all previous listings or versions thereof:

1. (Previously presented) A genetically modified plant that expresses a lactate dehydrogenase-C4 or an antigenic fragment thereof.
2. (Cancelled)
3. (Previously presented) The genetically modified plant of claim 1, wherein said lactate dehydrogenase-C4 is a rodent lactate dehydrogenase-C4.
4. (Previously presented) The genetically modified plant of claim 3, wherein said rodent lactate dehydrogenase-C4 is a rat or mouse lactate dehydrogenase-C4.
5. (Currently Amended) The genetically modified plant of claim ~~[[1]]~~16, wherein said antigenic fragment ~~is selected from the group consisting of~~ comprises amino acids 1-15, 5-17, 44-58, 61-77, 97-110, 180-210, 211-220, 231-243, 283-306, 307-316, and or 101-115 of murine lactate dehydrogenase-C4.
6. (Original) The genetically modified plant of claim 1, wherein said plant is selected from the group consisting of potato, tobacco, corn, banana, wheat, rice, fruit, vegetable, legume, and grain crop.
7. (Withdrawn) A method of decreasing the fertility of an animal, comprising the step of: providing said animal the genetically modified plant of claim 1 thus allowing said animal to ingest the plant.
8. (Withdrawn) The method of claim 7, wherein said animal is selected from the group consisting of mouse, rat, deer, elephants, water buffalo, feral horses, foxes, urban or wild dogs,

urban or wild cats, rabbits, and other potentially overpopulated species causing economic damage to society.

9. (Withdrawn) A genetically modified plant that expresses a sperm-specific polypeptide lactate dehydrogenase-C or an antigenic fragment thereof.

10. (Withdrawn) The genetically modified plant of claim 9, wherein said lactate dehydrogenase-C is a rodent lactate dehydrogenase-C.

11. (Withdrawn) The genetically modified plant of claim 10, wherein said rodent lactate dehydrogenase-C is a rat or mouse lactate dehydrogenase-C.

12. (Withdrawn) The genetically modified plant of claim 9, wherein said antigenic fragment is selected from the group consisting of amino acids 5-17, 44-58, 61-77, 97-110, 180-210, 211-220, 231-243, 283-306, 307-316, and 101-115 of murine lactate dehydrogenase-C.

13. (Withdrawn) The genetically modified plant of claim 9, wherein said plant is selected from the group consisting of potato, tobacco, corn, banana, wheat, rice, fruit, vegetable, legume, and grain crop.

14. (Withdrawn) A method of decreasing the fertility of an animal, comprising the step of: allowing said animal to ingest the genetically modified plant of claim 9.

15. (Withdrawn) The method of claim 14, wherein said animal is selected from the group consisting of mouse, rat, deer, elephants, water buffalo, feral horses, foxes, urban or wild dogs, urban or wild cats, rabbits, and other potentially overpopulated species causing economic damage to society.

16. (New) The genetically modified plant of claim 1, wherein the plant expresses a lactate dehydrogenase-C4.

17. (New) The genetically modified plant of claim 1, wherein the plant expresses an antigenic fragment of a lactate dehydrogenase-C4.
